---

At this time we believe your plan will work. As we continue to get closer we can make minor changes but we don't see any issues at this time.

Chief Timothy Kelly  
Devens Fire Department

Please excuse the brevity of my message, I am replying from my iPhone in order to reply as quickly as possible.

Good morning Chief Kelly,

I was wondering if you had any thoughts or comments on this plan. We have our next public hearing scheduled for next Tuesday and if there is any possibility we could get your blessing or your comments by then, it would be extremely appreciated.

Is there any additional information you would like from us? I will be in Devens tomorrow and can drop a paper copy off in case the last one didn't get to you.

Please let me know if you have any questions, thank you!

Hi Chief Kelly,

The truck is modeled as a E-One Cyclone II Chassis. It is the same truck Highpoint used for 33 – 45 Jackson, along with 111 Hospital Road (CFS) for turning studies. If you would like to see a different truck, please let me know and I will work on digging up the specs.

If there is anything you would like to discuss, or would like a hard copy delivered, please let me know and I can stop by on Monday when I am on-site.

Thanks for your help. Please call or email if you have any questions or comments.

At first glance it looks OK, I am not sure which set of vehicle specs you are using. I have not had time to review it with my team

Hi Chief Kelly,

Did you happen to get a chance to look at the exhibit so we can hear your thoughts?

Please let me know if you have any questions or comments for us, thank you.

**Subject:** 57-75 Jackson - Truck Turning & Hydrants

Hi Chief Kelly,

I am working on the proposed development project at 57 – 75 Jackson Road and would like to submit this plan for your review and comment.

The fire trucks should have no issues circulating the site as can be seen in the attached. The limits of the wheels are shown in red, and the truck's overhang is shown in green. Each proposed hydrant has a 250' circle to show that there is a hydrant located within 250' of all areas within the proposed building footprints.

Please let me know if you have any questions or comments, and if you would like to discuss in person or receive a paper copy of this plan. Thanks for your help!
