Re: Climate Change Mitigation @ 33 Lake George Devens

To Whom It May Concern:

In regards to the Devens Enterprise Commission's climate change mitigation requirements in accordance with 974 CMR 4.11 (<https://devensec.com/rules-regs/decregs411.html>) TPE Solutions has satisfied this requirement by (a) intending to join the Devens Eco-Efficiency Center, (b) taking all reasonable steps to comply with EcoStar Standard 24, and (c) and constructing our new building to combat climate change by: (1) constructing the roof to be solar ready, and (2) considering a move to all electric so we will be constructing the building to be electric ready.

Best Regards,

Beth Stagnone
